ABOUT ME

Versatile and driven Electrical and Electronics Engineering graduate with a strong foundation in circuit design, embedded systems, automation, and software development. Proven hands-on experience in projects involving IoT, PLC/HMI, Raspberry Pi, data logging, PCB design (Altium, KiCAD), and application development. Proficient in multiple programming languages (Python, C/C++, Java) and tools (MATLAB, AutoCAD, LabVIEW, PyQt, SQL). Adaptable across a wide range of domains—from core electrical and embedded systems to software and automation—with a passion for real-world problem-solving and continuous learning. Ready to contribute effectively from day one in any dynamic, tech-focused environment.

EDUCATION

2021-2025

Adichunchanagiri Institute of Technology, VTU

Bachelor of Engineering in Electrical and Electronics

2019-2021

St. Francis de Sales College

Pre-University (PCMB)

2019

Swamy Vivekananda School

SSLC (ICSE)

CERTIFICATIONS

Embedded Systems Using Thinkercad - Karunadu Technologies Pvt. Ltd.

Machine Learning and Its Application - Karunadu Technologies Pvt. Ltd.

INTERNSHIP EXPERIENCE

Intern - Microcon i2i (15 Weeks)

Gained practical experience in industrial automation and control systems.

- Hands-on programming with PLC platforms: Delta ISPSOFT, GX Works, TIA Portal
- Developed HMI interfaces using DOPSOFT and GT Works3
- Designed and interpreted electrical schematics using AutoCAD

Created and executed projects including:

- Universal Testing Machine (UTM) Automation
- Full Wheel Leakage Testing System
- Mobile-Controlled Electrical Panels

TECHNICAL SKILLS

Programming: Java, Python, C, C++, SQL, HTML, CSS

Tools & Platforms: MATLAB, LTspice, PyQt5, AutoCAD, MI-Power, LabVIEW, KiCAD, Altium

PLC & HMI Software: Delta ISPSOFT, GX Works, TIA Portal, DOPSOFT, GT Works3

General Tools: MS Word, PowerPoint, Excel, Canva, Jupyter Notebook, Turbo C++, VS Code, Anaconda

PROJECTS

Driver Drowsiness Detection and Alert System Using Raspberry Pi:

Used OpenCV and facial landmark detection for fatigue analysis with alerts and safety integrations.

Laser Li-Fi: Advancing Li-Fi with Laser Communication:

Designed a secure, high-speed Li-Fi system using laser beams and solar panel receivers.

Solar Powered Garbage Monitoring System:

Created an IoT solution for waste management using solar power and ultrasonic sensors.

Kitchen Automation:

Developed a smart kitchen system using sensors (smoke, motion, ultrasonic, LDR) and Arduino Nano.

Ultrasonic Digital Ruler:

Built a contactless distance measurement device using an ultrasonic sensor and Arduino.

KEITHLEY Data Logger:

Developed a PC-based data logging application for the KEITHLEY 2000 multimeter using RS-232 communication. The tool enables real-time acquisition, logging, and graphical visualization of high-precision electrical measurements such as voltage, current, and resistance. Features include multi-parameter tracking, customizable sampling rates, and a user-friendly interface for efficient data analysis.

LANGUAGES

Kannada | English | Hindi | Telugu

PERSONAL DETAILS

Date of Birth: 19/07/2003

Nationality: Indian

I hereby declare that the above information is true to the best of my knowledge and belief.
